(December 9, 1965 in Lima, Peru)

The founding members were: Teodoro Henry Ayala (Colombia), Eugenio Elizalde (Peru), Carlos A. N. Firpo (Argentina), Enrique Jenkin (Chile), Edgard Kamel (Venezuela) and Eduardo Zancolli (Argentina)

Peruvian Association of Hand Surgery and Microsurgery

The South American Society of Hand Surgery and Microsurgery was founded on December 9, 1965 in Lima, Peru. Ever since, many surgeons interested in this subspecialty have taken care of thousands of patients in our country and overseas.

Among the foremost surgeons involved in the growth and expansion of hand surgery in our country were doctors Juan José Rodríguez Lazo, Beatriz Barletti Tejada, Joel Garay Espinoza, Franklin Seminario, José Ladines Ropjas, Alberto Figueroa Gutarra, Alfredo Torres, Elsa Castro. Along with other surgeons they sought and applied knowledge in their institutions.

Dr. Alfredo Torres, Dra. Blanca Castillo, Dr. Alberto Figueros

Dra. Elsa Castro, Dr. Juan José Rodríguez, Dra. Beatriz Barletti

Dr. Franklin Seminario.

Dr. Joel Garay.

Dr. José Ladines.

Along several decades these health professionals motivated new generations of surgeons. The numbers of subspecialists in hand surgery increased.

A worldwide interest in hand surgery led to a steady increase in the numbers of specialists. In our country a few attempts were made to establish an organization dedicated to this area. Such attempts did not prosper due to organizational deficiencies.

After significant effort the Peruvian Association of Hand Surgery and Microsurgery was established, on November 13, 2014. This was made possible thanks to the dedication and leadership of Dr. Alberto Figueroa and Dr. Mirko Tello.

At the present time, our association has 32 active members, and 29 honorary members. Three elected Boards of Directors have served so far. Each one had distinct views for our young association. But all shared the common goal of guiding new generations of hand surgeons.

Newly Associated Young Surgeons

3rd Board of Directors Dr. Bruno Pietrapiana (President), Dra. Blanca Castillo, Dr. Álvaro Mena, Dr. Julio Echevarría, Dra. Mariana Pendavis

Dr. Bruno Piegtrapiana and Dr. Mirko Tello

Our symbol: the crossed hands of Kotosh

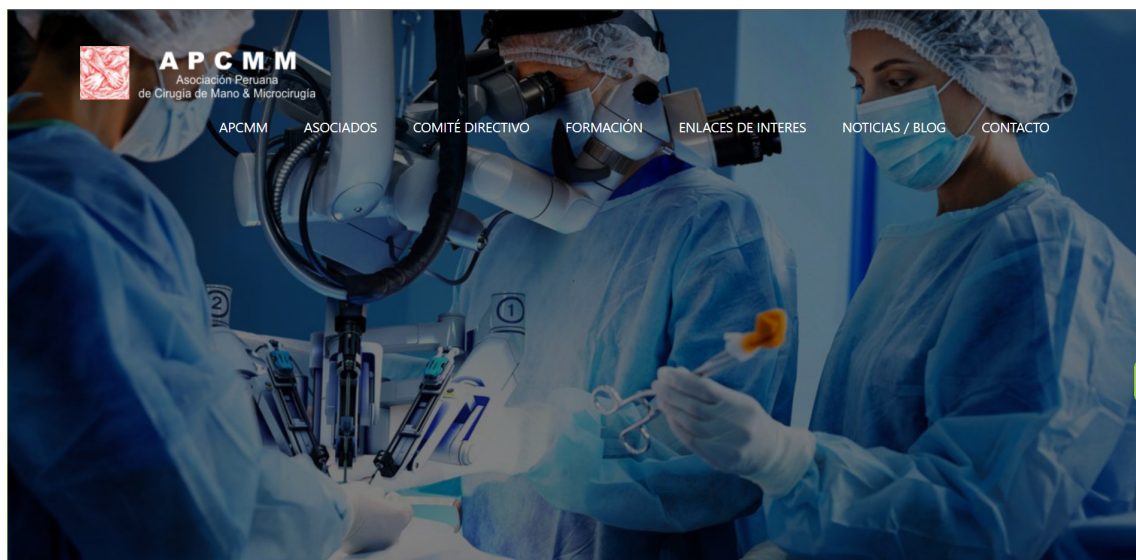

Kotosh is an archeological site located in Huanuco, in Central Peru. The temple of the Crossed Hands is a building in the compound. It dates back to 1800 BC. Kotosh was an important link and landmark in Peruvian civilizations.

Our symbol expresses our *raison d'être* and carries part of our history. We are humble heirs of the struggles of our teachers and their labors for our patients wellbeing and health.

The crossed hands of Kotosh portray clearly the central object of our specialty. Our symbol is easily recognizable and yet so simple. It carries historical significance and reminds us of our forebearers. It pays homage to great teachers and friends who earned our loyalty and admiration. We feel obliged to follow their footsteps and to search for new solutions for our patients.
