*14<sup>th</sup> Triennial Congress of the  
International Federation of Societies for Surgery of the Hand*

*Berlin, Germany*

*17<sup>th</sup> - 21<sup>st</sup> June, 2019*

## **IFSSH Pioneers of Hand Surgery**

Traditionally during the Congresses of the International Federation of Societies for Surgery of the Hand, a number of “Pioneers of Hand Surgery” are acknowledged. This is a long standing custom dating back to the 3<sup>rd</sup> Congress in Tokyo held in 1986.

Since then, 180 physicians have been designated the prestigious title of “Pioneer of Hand Surgery”. To this number, 37 more are added this year.

Every three years, the IFSSH Member Societies nominate Pioneer candidates who are then submitted to the IFSSH Executive Committee and evaluated by the Nominating Committee. During the Opening Ceremony at the next IFSSH Congress these Pioneers will then be honoured. To be considered a Pioneer, a candidate must be a recognised leader in hand surgery and have contributed to the development of Hand Surgery nationally and/or internationally.

Their enormous contribution to Hand Surgery will influence many generations of Hand Surgeons to come. Ultimately or course, their accomplishments will benefit countless patients far into the future.

The IFSSH Membership expresses its sincere appreciation and gratitude to our Pioneers for enriching our passion, Hand Surgery.

#### **Teaching and Training:**

The Oxford Hand Unit now has nine hand surgeons (representing about six full-time equivalents for hand surgery) from both orthopaedic and plastic surgery backgrounds. It trains two fellows each year and runs annual cadaver workshops for junior surgeons. I managed the development of the unit from 1986 to 2000.

#### **Publications:**

~50 peer-reviewed scientific publications

18 book chapters / review articles

### **Summary of Microsurgical Contribution of Professor David CC Chuang:**

- **Unprecedented Microsurgical Experience in Peripheral Nerve Surgery**
  - 1- More than 2000 cases of adult brachial plexus exploration and reconstruction.
  - 2- More than 1000 cases of functioning free muscle transplantations for face, and upper and lower extremities reconstruction.
  - 3- Numerous reconstructions of obstetrical brachial plexus palsy, facial paralysis, compression neuropathy (thoracic outlet syndrome, cubital tunnel syndrome, carpal tunnel syndrome and leg nerves), peripheral nerve injury (radial, median, ulnar, femoral, sciatic, common peroneal nerve. etc.)
  - 4- Some thousands peripheral nerve tumors resection.
- **Pioneering, Revolutionizing Concepts and Developing Innovative Techniques in Peripheral**

#### **Nerve Surgery and Functioning Free Muscle Transfers:**

- 1- Classification of level of brachial plexus injury.
  - 2- Classification of level of radial nerve injury.
  - 3- Classification of severity of postparalysis facial synkinesis and strategy for treatment.
  - 4- Classification of traction avulsion amputation of the major limb.
  - 5- Technique of a reliable combined gracilis myocutaneous flap harvest.
  - 6- Revolutionary technique of FFMT for facial nerve reconstruction.
  - 7- Surgical treatment of thoracic outlet syndrome.
  - 8- Sub-fascial anterior transfer for cubital tunnel syndrome.
  - 9- Operative methods of nerve transfer for irreparable brachial plexus avulsion injury.
  - 10- Contralateral C7 transfer with free vascularized ulnar nerve graft.
  - 11- Intercostals nerve transfer to the musculocutaneous nerve and nerve transfers.
  - 12- others
- Many of them have been published in many major journals and text books and frequently cited.

#### ● **Scientific Publication and Academic Pursue**

- 1- Author of “**Adult and pediatric brachial plexus injuries**” for the three editions of “**Plastic Surgery**” (2<sup>nd</sup> edition 2006, third edition 2013, and fourth edition). many other textbook chapters and articles of journals.
- 2- Reviewer of the leading journal in our field, including PRS and PRS Global Open (international reviewer: 2014-2016, 2017-2019), JPRAS, JHS(America), JHS (European), JRM, and PRS- ROC

## **Felipe Coiffman**

Colombian Association for Surgery of the Hand

## Felipe Coiffman

Place of birth: Nova-Sulita, Moldova (formerly belonged to Russia).

Date: November 10, 1926.

His parents emigrated to Colombia in the year of 1932 because in Europe the anti-Semitic wave unleashed in Germany. There were 6 children of this family of which three were born in Colombia (Efraín, Alberto and Cecilia) and three in Europe (Rebeca, Boris and Felipe). Dr. Coiffman was 6 years old when he arrived to Colombia. He did his primary studies at the San Lorenzo de Armero School, Tolima, and his high school studies at the Isidro Parra Institute in El Líbano, Tolima. He finished his medical studies at the National Faculty of Medicine of the National University of Colombia in Bogotá on July 31, 1954. His thesis was declared worthy.

He made his internship in the Hospital of San Juan de Dios in Bogotá. The rural medicine was carried out in Armero, Tolima, in the years 1952 and 1953. In the year 1954 he married Mrs. Fanny Fraynd, of Polish origin, from this marriage were born, Bernardo and Sandra. In the year of 1956, in the halls of the Medical Club of Bogotá, he participated along with the doctors Guillermo Rojas Rodríguez, Hernando Castro Romero, Humberto Dorado Garcés, Nestor Godoy, Luis González Torres, León Hernandez Gutierrez, Alvaro Londoño Mejía, José Ignacio Mantilla Fuentes, Guillermo Nieto Cano, Gerardo Obonaga and Juan Ruiz Mora at the founding of the Colombian Society of Plastic Surgery. Being the last of the twelve "Quixotes", as mentioned by Dr. Hernando Castro Romero in his article on the founding of the Society, to remain alive, becoming until 2018, in the Dean of plastic surgeons. In 1954 he traveled to the United States where he made his specialization in plastic surgery at the Mount Sinai Hospital in New York under the direction of Professor Arthur Barsky. Returning from the United States and from June of 1956, he made his academic career at the San Juan de Dios Hospital in Bogotá, School of Medicine. He started as a clinic manager, then a plastic surgery instructor until he became a professor.

From there he imparted his teachings to aspects of the management of congenital deformities, burns, the urgency of the difference, skin coverage and management of flexor tendon injuries

In 1986 he published the first edition of his magnum opus "Plastic, Reconstructive and Aesthetic Surgery", the fourth edition is published in 2016 in 6 volumes, one of them dedicated to the Surgery of hand. It has 144 national and foreign collaborators.

In September of 1993 he was appointed honorary professor of the National University of Colombia. In 1995 he received the title of Professor Emeritus of the National Faculty of Medicine. He wrote more than 300 scientific papers, presented in several national and international conferences and published in different scientific journals of the specialty of plastic and hand surgery. He recently published a book entitled "Basic plastic surgery for the non-specialist", which has been very well received by non-specialist surgeons.

He belonged to the following scientific societies: Colombian Society of Plastic Surgery of which he was Founding Secretary and several times its President. Colombian Medical Federation. Colombian College of Surgeons. Medical College of Cundinamarca. Colombian Society of Hand Surgery. American Society of Plastic and Reconstructive Surgeons. International Confederation for Plastic and Reconstructive Surgery, of which he was a member of the Central Executive Committee for eight years representing Ibero-Latin America. American College of Surgeons (F.A.C.S). International Society of Aesthetic Plastic Surgery. American Society for Laser Medicine and Surgery. Ibero-Latin American Federation of Plastic Surgery. International Society of Hair Restoration Surgery. American Society for Aesthetic Plastic Surgery and others. He was President of the VII Ibero-Latin American Congress of Plastic Surgery that was held in Cartagena in May 1988.

He pioneered many procedures in Plastic Surgery, in 1965, he performed at the San Juan de Dios Hospital the first sex change surgery, in a case of gender dysphoria from woman to man. He also started with hair grafting procedures and liposuction procedures. He held the positions of Professor of Plastic Surgery at the National University of Colombia and the University of the Andes. He is a member of the Plastic Surgery Section of the Santa Fe Foundation of Bogotá. He is a member of the National Academy of Medicine.

In his posthumous legacy there is a new book entitled "When and how the human race will disappear", which is waiting for a publisher. I appoint an Editorial Committee to continue publishing its legacy, the book "Coiffman. Plastic, Reconstructive and Aesthetic Surgery ", fifth edition.

He was fond of painting, especially the one related to nature, he left many paintings, some of which remain in his house, others are in the house of his friends, colleagues and in the Plastic Surgery Service of

the Hospital of San José. He was an accomplished music lover, he performed piano works of classical music, opera and ballet at the piano.

His greatest satisfaction was teaching.

He died in Bogotá on August 14, 2018, at 92 years old, being an example of life and inspiration for several generations of plastic surgeons. One of his favorite phrases, when one was going to ask him for a favor: "Granted, now tell me what it is about."

## **Diego Fernandez**

Swiss Society of Hand Surgery

## Diego Fernandez

Dr. Diego L. Fernandez is an Orthopedic and Hand Surgeon who was born in Buenos Aires, Argentina on July 6, 1945 and graduated from St. Andrew's Scots School in Buenos Aires in 1963. He received his medical degree from the University of Buenos Aires in 1970.

Trained in Orthopedic Surgery and Hand Surgery under Prof. Eduardo Zancolli in Buenos Aires, with Harold Boyd and Lee Milford at the Campbell Clinic, Memphis Tennessee, and with Prof. M.E. Müller in Bern, Switzerland. He was Chief of the Hand Surgery Unit within the Orthopedic Department until 1977.

Thereafter he became staff member of the Orthopedic Department of the University of Berne from 1978 until 1983 under Prof. Müller and Prof. R. Ganz. He was Chief of Traumatology of the Surgical Department, Kantonsspital Aarau, Switzerland between 1983 and 1992.

From 1992 until March 2017 he was Staff Member of the Orthopedic Department at the Lindenhof Hospital in Bern. Until September 2018 he was in private practice at the Hand Team Bern and consultant orthopedic surgeon for elbow, wrist and hand at the Siloah Hospital in Bern.

In 1991 Dr. Fernandez became Associate Professor, in 1992 he received the Swiss medical degree and in 2004 he was promoted to Honorary Professor of Orthopedic Surgery of the University of Berne.

Currently he continues teaching hand and upper extremity surgery as an international consultant.

Professionally, he is a devoted upper extremity, hand and trauma surgeon. Throughout his career, he has written 160 articles and book chapters in peer-reviewed orthopedic literature. His particular academic interest is related to surgery of the wrist joint. Among his favorite subjects there is the treatment of distal radius and scaphoid fractures as well as their complications. He has authored numerous articles and chapters relating to these topics and together with Dr. Jesse Jupiter he produced a comprehensive book entitled: "Fractures of the Distal Radius: a practical approach to management".

His favorite hobbies are jazz piano playing, stand-up-paddle wave surfing, ski, and kite surfing.

### **I. Exceptional Ability to Teach and Train Surgeons, Residents, Fellows**

- A. Orthopaedic surgery faculty at Massachusetts General Hospital and Harvard Medical School since 1981

Educated over 400 Orthopaedic and Plastic Surgery residents and over 80 Hand Surgery Fellows

- B Educated hundreds of trainees worldwide in bioskills courses

- C Educated over 100 visiting Fellows from 30 different countries

- D Recognition: AOA Career Educator Award; Lee Osterman Award for Lifetime Excellence in Education, ASSH; 1<sup>st</sup> Distinguished Alumnus Harvard Orthopaedic Residency

### **II. Significant Contribution to Basic Hand Surgery Research**

My basic research interests have centered about microsurgical questions as well as bone substitutes

### **III. Significant Contributions to Clinical Hand Surgery Research**

I have contributed with new surgical approaches and techniques for microsurgical reconstruction as well as management of fractures of the elbow, hand and wrist. I have worked extensively with preoperative planning using bone models. My service have performed many prospective randomized studies of clinical problems.

### **IV. Peer review publications that have substantially added to the understanding of hand surgery.**

I have published over 400 peer review articles. Those that have dealt with the assessment and management of traumatic and reconstructive problems of the distal radius as well as elbow and forearm have had a direct impact on patient management

### **V. Publication of chapters/books which have made significant contributions**

I have published 182 book chapters and co-authored and/or edited 12 books.

## **VI. Significant involvement in outreach programs of significant importance**

Prior to Orthopaedic residency, I spent 2 years as a primary care M.D. with our Native Americans. While in leadership positions within the International Committee of the AAOS, I established an ongoing program with Kumasi Medical Complex in Ghana. Likewise while in leadership of the AAHS and ASES, I helped coordinate ongoing outreach programs also in Ghana as well as Guatemala. I have donated numerous copies of textbooks that I have edited to countries in the Middle East and Asia over the past 20 years. I am a consultant to the Orthopaedic community in Baghdad, Iraq

- C.** I have been awarded honorary membership in 22 different international Hand or Orthopaedic Societies

**VIII. Significant contributions to promote hand surgery nationally**

I was President of the AAHS in 2014 and have been on numerous committees for the ASSH

I have been course director of over 100 Instructional Courses related to hand and wrist problems within the national meetings of the ASSH and AAOS

**IX. Visiting professorships and invitations to lecture internationally**

Among the 164 Visiting Professorships, 69 have been international and 6 Eponymous. These have included centers in Latin America, Europe, Middle East, Africa, Asia. and Australia

**X. Paper and poster sessions at international meetings**

I have given over 500 presentations in international meetings covering a wide variety of topics involving the upper limb

**XI. Preparation of video programs for teaching programs**

Over the past 30 years I have prepared over 50 teaching videos for surgical skills course within the AO organization. More recently I have made 9 videos displayed worldwide through Vu-Medi

**XII. Development of equipment and processes for clinical use or academic programs**

Working with the AO Foundation, I was part of a team that developed the initial locking plate for the distal radius as well as the wrist fusion plate. I later worked on the development of the distal humerus locking plate set as well as the proximal humeral blade plate. I have also worked with the Trimed company on a novel design for distal humerus fractures.

*South African Society for Surgery of the Hand ( SASSH*

ULRICH MENNEN was born in Barberton on 1 July 1947, and matriculated in Nelspruit(1964), (now Mbombela, Mpumalanga), South Africa, and graduated as a Medical Doctor (MB. ChB) in 1970 from the University of Pretoria. He worked and studied in Germany, the UK and Canada for a number of years, qualified as a General Surgeon (FRCS Glasgow and FRCS Edinburgh)(1978) before completing his degree as an Orthopaedic Surgeon (MMed Orthopaedics) in 1980 at the University of Pretoria, as well as at the College of Medicine of South Africa (FCS (SA)Ortho).

In 1983, Mennen did a Fellowship in Hand and Microvascular Surgery at the Duke University Medical Centre, Durham, North Carolina, USA, with James Urbaniak.

He completed his first doctoral degree (MD Orthopaedics) on bone healing and internal fixation of fractured bones (the 'Parasketetal Clamp-on Plate')( "MCOP") in 1983. He was promoted to Professor in the same year in the Department of Orthopaedic Surgery of the University of Pretoria.

The Medical University of Southern Africa (MEDUNSA) near Pretoria requested Prof. Mennen to establish and head the Department of Hand- and Microsurgery in 1985. This active department has hosted numerous international Hand Surgeons and has trained surgeons from all disciplines in the art of microsurgery, taught many registrars and hand fellows (local and international) and has been involved in the teaching of thousands of medical students.

In 1992, he also started a private hand surgery practice at the Jacaranda hospital in Pretoria until his retirement from clinical practice in 2018.

Prof. Mennen has over 230 publications, book chapters and books to his credit, has lectured in 39 countries and visited numerous hand surgery units internationally, some as visiting professor.

He obtained his second doctoral degree (DSc Med) on the 'End-to-Side Nerve Suture technique' in 2007.

He has been on the Executive Council of the South African Society for Surgery of the Hand (SASSH) for 30 years and has been the President of this Society (1995-1997), as well as the Historian for 27 years.

In 1998, he was elected by the Delegates Council of the International Federation of Societies for Surgery of the Hand (IFSSH) to its Executive Committee, serving on and chairing a number of technical committees. In 2004, he became Secretary-General of this international hand surgery fraternity. In October 2010, he was elected President of the IFSSH and served until 2013. He served as Chairman of the Nominating Committee of the IFSSH from 2013 until 2016.

As the first editor, Prof. Mennen launched the "IFSSH Ezine", the official electronic magazine of the International Federation of Societies for Surgery of the Hand in February 2011. It is sent every three months to many thousands of Hand Surgeons and Hand Therapists as well as other interested doctors throughout the world. All previous issues can be sourced on [www.ifssh.info](http://www.ifssh.info)

Ulrich Mennen is married to Johanna M. Mennen (née Louw), and the couple have three children (Albert a lawyer, Mathilda a medical doctor and Abraham a professional musician)

**Thesis for Doctorate in medicine : supracondylar humerus fractures in childhood. Counselor: Prof. Dr. Ridvan Ege**

During my stay with Dr. Carroll in his servise He deepened my interest to hand surgery and microsurgery. He also draw my attention to the necessity of founding hand surgery centers in Turkey. I also start microsugery practise in laboratory in his service.After being back to Turkey to the Ortopaedic department of School of medicine Ankara universiy, I devoted all my practice to Hand surgery. I got the degree of assistant professor in 1982. I joined The Turkish Hand Society and have been an active member since then; I served in Turkish Hand Society as a general secretary, president and dalegate to IFSSH international comities in Phoenix november 12th, 1992 and Kansascity october 1st,1993 . Because of University regulations in Turkey after !980, I was appointed December 1982 as the chief of orthopaedic department of School of medicine of Akdeniz University in Antalya, Turkey. I established hand surgery practice in orthopaedic department of school of medicine in Antalya as a

pioneer and I was very active as a Hand Surgeon in orthopaedic department of medical school. upon Invitation Of Dr Gülgönen who was the pioneer after prof Dr. Rıdvan ege in Turkey I Moved on to İstanbul on june 1985 and I started practising in French Hospital Which was the only center doing replantation surgery and hand surgery in Turkey at that time. I would like to share the words of the one resident who is interested in hand surgery and he is profesör in Antalya. His feeling is on web site; "El cerrahisi ve mikrocerrahi alanına ilgim Anabilim Dalı'mız öğretim üyelerinden Prof. Dr. Oguz Polatkan'ın 1982 yılında başlayan çalışmalarının bölümümüzde oluşturdugu deneyim birikimi ve potansiyelin varlığı nedeniyle başladı"

After I resigned Akdeniz University My presentations in national congresses and meetings about our practice in French Hospital a mystery came true. Young surgeons began to visit french hospital. Also I was very active for the courses which are first organized in the french hospital and later in hospital of other cities upon request. After French hospital which was closed in june 1991 I organized another center named "İstanbul Hand and Microsurgery Center" in 1991 with three fellow; two hand surgeons and one anesthetist. This organization also was very active for the young surgeons who are eager to learn hand surgery and microsurgery.

I assigned as an associate professor of orthopedic surgery and also chairman of orthopedic surgery in school of Medicine KOCAELİ University 1995 March In city of KOCAELİ near by İstanbul. As a pioneer I would like to share the personal statement of one of the residence personal statement He is also Prof Dr. In Orthopaedic Surgery and He is Very active in Hand Surgery: "After returning home after USA I met with Dr. O Polatkan in one of the congresses, current president of our hand society. He was an associate professor with hand fellowship training in NY. He was a man who made me to become a hand surgeon with kind, talented, long and patient conversations.

American Society for Surgery of the Hand

## Peter J. Stern

### 1. Ability to teach and train fellows:

Trained 66 fellows---ACGME accredited Mary S. Stern

ACADEMIC PRACTICE AT (U. Cincinnati, UT Southwestern, Georgia Health Sciences, Northwestern (2), U. Minn, Wash. U (3), Penn State, Jefferson, U. Penn., U. Michigan

### 2. Significant contributions to basic hand research:

Peer reviewed manuscripts on: skeletal response to thermal injury (rats), biomechanical stability of PIPJ, Anatomic study on nerve innervation of thumb; median nerve fat pad; phylogeny of wrist; Ultrasound to assess accuracy of hand injections

### 3. Significant contributions to clinical hand research:

Approx. 190 peer reviewed publications on

1. Traumatic Disorders of the PIPJ
2. Management of the arthritic wrist conditions(long term studies on proximal row carpectomy)
3. Arthrodesis in the hand and wrist (thumb CMCJ, wrist, PIP and DIP joints)
4. Hand infections (bacterial, atypical mycobacteria)
5. Fracture fixation-acute; nonunion, malunion

### 4. Publications in peer reviewed journals which have substantially added to understanding of hand surgery

#### **6. Outreach**

- OVERSEAS MEDICAL MISSIONS: HONDURAS (8), PHILLIPINES (2), COSTA RICA AND DOMINICAN REPUBLIC (1 each)

#### **7. International Contributions**

- IFSSH Committee on infection (~ 1985-1989)
- Invited lectures in: Canada, Bermuda, Honduras, Mexico, Scotland, S. Korea, Oslo, S. Africa, Hong-Kong, G. Britain, Harbin China, Rio de Janeiro, Santiago Chile, Singapore, Paris, FR.

#### **8. Contributions to promote hand surgery nationally and society activities**

##### **Past president of**

- American Society for Surgery of the Hand---2000-2001
- American Orthopaedic Association--- 2007-08
- American Board of Orthopaedic Surgery---2004-05

##### **Other**

- Past Chairman: ACGME Orthopaedic RRC---2007-2009
- Past Secretary: ASRM---1992-1994

#### **9. Visiting Professorships**

- 72 visiting professors
- 48 Endowed lectureships (all USA)
- Presentations at International Meetings in 15 countries

#### **10. Paper and Posters at International Meetings**

- No poster
- Approx. 60 presentations

#### **10. Videos for teaching purposes**

- Four videos produced

**11. Development of Equipment and Processes for Clinical Use**  
- None

**OTHER**

**AWARDS:**

- University of Cincinnati, Department of Orthopaedic Surgery, RECIPIENT, "Resident Appreciation Award", 1983, 1988, 1989, 1991, 1996, 2018
- American Soc. Surg, Hand: Bruner Award (2009); Koch Award (2011) ; Boyes Award—co-author (2013); Osterman Award for Lifetime Excellence in Education (2015)
- American Orthopaedic Association: Distinguished Clinician Educator Award (2012)

**APPOINTMENTS:**

Chairman, Department of Orthopaedic Surgery, University of Cincinnati College of Medicine, September 1992 – 8-31-2013  
Norman S. and Elizabeth C.A. Hill, Professorship of Orthopaedic Surgery, August, 1994 to present

**NOT FOR PROFIT FOUNDATIONS**

**JOURNAL EDITORIAL BOARDS**

*Journal of Bone and Joint Surgery [Am]:*

- Associate Editor: 1/1/00 – 12-31-03
- Deputy Editor, December, 2006 - 2010

*Journal of Hand Surgery [Am]:*

- Associate Editor, 1990-1995
- Deputy Editor, 1996 – 1999 and 2004 – 2006

## **Lam-Chuan Teoh**

Singapore Society for Hand Surgery

# Lam-Chuan Teoh

**Date of birth: 4<sup>th</sup> June 1949**

## Medical Education

1. Graduated with MBBS from the National University of Singapore in 1976.
2. Obtained his M.Med Surgery and FRCS fellowship in 1981
3. Completed Kleinert Louisville Hand Surgery Fellowship training in 1987.

## Current Appointments

1. Senior Consultant Hand Surgeon of Hand Surgery Section @ Tan Tock Seng Hospital.
2. Clinical Assoc. Professor, Yong Loo Lin School of Medicine, National University of Singapore
3. Anatomy tutor to Department of Anatomy @ National University of Singapore
4. Adjunct Assoc. Professor, Lee Kong Chian School of Medicine
5. Visiting Consultant to KK Women & Children Hospital
6. Visiting Consultant to Hand Surgery Department @ Singapore General Hospital

## Past Appointments & Honours

1. Chief of Hand Surgery Department at Singapore General Hospital (1988-2003)
2. Past President of Singapore Society for Hand Surgery
3. Past President of Asian-Pacific Federation of Societies for Surgery of the Hand
4. Member of Hand Expert Group, AO Technical Commission (1999-2004)
5. Chairman of Specialist Training Committee in Hand Surgery (2005-2006)

## Teachings & Lectures

Invited as faculty members/ speakers in over 280 international, regional and local courses, conferences and meetings.  
Presented over 600 lectures and scientific papers.

## **Maggali Pastora Torrealba Marin**

Date of Birth: 18-11-1945

Nationality: Venezuelan

Profession: Medical Specialist in Hand Surgery and Traumatology and Orthopedics

### ACADEMIC TRAINING:

#### HIGHER EDUCATION:

Luis Razetti School of Medicine, Central University of Venezuela

Degree obtained: Surgeon. 1974.

Rotary Internship: January 1975 - December 1976

#### POSTGRADUATE:

Traumatology and orthopedics. University residence. January 1977 - December 1979. Title: Magister Scientiarum: Traumatology and Orthopedics

Hand Surgery University residence. December 1979 - December 1982. Title: Magister Scientiarum: Hand Surgery

#### OTHER STUDIES:

Basic course of Microsurgery at the Central University of Venezuela. Year 1981

San Francisco Microsurgery Course (California). Year 1983.

Internship in the Chair of Experimental Surgery of the Central University of Venezuela. Year 1982 -1983

External Fixation Course. Guadalajara Mexico. Year 1988.

Teaching teacher update. Year 1989

AO course from the basic to the most advanced on different national and international dates until Holder.

Course of Thesis Tutors at the Central University of Venezuela. Years 1995 and 1997

Individualized Master and Doctorate Workshop I, II, III and IV. Date May 1996 - 1997.

Advanced basic Arthroscopy course. Miami Hand Center United States.

International training and research course (FDA).

### WORK EXPERIENCE:

Postgraduate Rotary Internship

Residencies of Traumatology and Surgery of the Hand: 1975-1982 Hospital Miguel Pérez Carreño

### **Current academic appointment:**

Professor of Surgery, Department of Surgery, Harvard Medical School, Boston

### **Society leadership positions:**

President, New England Society of Plastic Surgery

President, New England Hand Society

### **Selected awards:**

Medical School: Michael DeBaake Award, best surgical student

Teaching awards: internship and as Harvard attending

Barrett Brown medal, best paper in PRS

Leonard Rubin award, best presentation ABPS

Lifetime achievement recognition: New England Plastic Surgery Society, Society of Pediatric Plastic surgeons

Distinguished Alumnus Yale University

Distinguished Clinician of the year, Rofeh International, Jewish philanthropy organization

Clinician of the year, American Board of Plastic Surgery

### **International honorary, corresponding memberships:**

National hand societies: Japan, Australia, England (British), France

National microvascular societies: Canada, Taiwan

International congenital hand study group

### **Visiting professorships:**

**National (USA) centers:** 72 times, Principal invited speaker for a named lectureship 23 times: Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Maryland, Washington DC, Georgia, North Carolina, South Carolina, Florida, Missouri,

Indiana, Wisconsin Minnesota, Colorado, Utah, Washington State, California, Nevada, Texas, Oklahoma, Alabama

**International centers** for a named lectureship 14 times: England, Canada, Germany, France, Belgium, Austria, Italy, Peru, Australia, New Zealand, Singapore, Taiwan, China, Mexico, Iceland

Specific to the IFSSH are numerous invitations to the above countries for additional instructional courses and presentations

**Ability to teach hand surgery:**

42 years of mentoring medical students, plastic and orthopedic residents, and fellows  
Residents (plastic surgery) trained: 150; Fellows (hand-microvascular): 72; Medical students: unknown

Fellowship program director 33 years

Cadaveric dissections, gross anatomy curriculum at HMS, fresh dissection courses yearly

**Basic contributions to hand surgery:**

Anatomic dissections head and neck plus hand, technical refinement of most congenital procedures, long-term follow-up of reconstructive hand procedures (present book project); vascular malformations, pediatric microsurgery and hand surgery, videos on  
With emphasis upon the technical refinements of advanced techniques

**Contributions to basic science of hand surgery:**

Approximately 12 years of work in the Vacanti Lab in the 1990s dealing with angiogenesis, cartilage and bone regeneration and the fabrication of joint constructs  
Detailed anatomic definition of free flap donor sites: temporoparietal fascia; omentum; forearm and medial arm, 1<sup>st</sup> web space on the foot

**Contributions to clinical hand surgery:**

Early definitive papers on extravasation, pediatric toe to hand transfer, vascular anomalies: classification and treatment; pediatric free tissue transfer to all parts of the body including the earliest transfers in young children including: fascia, omentum, scapular flap, medial arm flap, forearm, testes, ovaries, fibula and scalp; definitive articles, chapters, plus a book on congenital hand anomalies, book on syndromes associated with hand anomalies, present book on reconstruction of the thumb and finger

**Papers at international meetings:** 24 **Poster presentations:** 5 (that I know of)

**International contributions to promote hand surgery:**

IFSSH committees dealing with classification of congenital anomalies

Hand mold exhibitions shown globally via media

Numerous instructional courses on congenital anomalies or pediatric microsurgery at IFSSH meetings

Exhibition molds at Museum of Science, Boston 1985-present

**Publications in peer reviewed journals:** papers 182, reviews and invited discussions 52

**Chapters and books:** 102 chapters and monographs in edited textbooks;

**Book projects:**

Apert syndrome, 1990, Clin Plast Surg

Congenital anomalies of the hand, 12 chapters -500 pages- in Mathes, S. Plastic Surgery, Volume 6, Elsevier, 2005, single author (JU)

Congenital Hand Anomalies and Associated Syndromes, Rayan G & Upton J., -600 pages- Springer, 2014, 2 authors

Reconstruction of the Thumb and Finger, authors Upton J, Chiu DT, Wei FC, Littler JW, Foucher G., -600 pages- Thieme, In press for 2019, 5 authors with Upton and Chiu major contributors.

**Editorial boards:** Served on editorial boards of 9 journals (hand, plastic surgery or microsurgery); reviewed submissions for 16 journals over past 42 years

**Prepared Videos:** 9 videos of specific operations

**Involvement in outreach:** Outreach clinics in Dominican Republic and Puerto Rico yearly 1990 to present as part of the Shriners system, Outreach to Central America twice as part of the Shrine, International outreach clinics through the congenital hand study group, two trips to Nepal

**Outreach education:** Since inception Vascular Anomalies Program at the Children's Hospital, Boston, we have had had a continual flow of physicians, researchers and students from all over the world visit and collaborate with us in anticipation of starting their own programs; at least 20 to 30 physicians and nurses formally visit per year; part of weekly clinic which reviews cases from all over the world at no cost to patient or referring physician

**Founding memberships:** American Association for Hand Surgery (ASHH), American Society for Reconstructive Microsurgery (ASRM), Helping Hand Foundation (parent support group in New England)

## **Irina Visa**

Romanian Society for Surgery of the Hand

## **Irina Visa**

Born on October 22, 1947 in Braila, Romania.

Graduated as GP, from the Faculty of Medicine of the Institute of Medicine and Pharmacy “Carol Davilla” from Bucharest in 1971.

Graduated in Plastic and Reconstructive Surgery in 1976, after studying at the Plastic Surgery Clinic Bucharest, headed by Prof. Dr. Agrippa Ionescu from Institute of Medicine and Pharmacy “Carol Davilla”.

As young specialist, she continues her professional activity in the Plastic Surgery Departament of the County Hospital Brasov, department founded and led by Valentin Aburel M.D. Ph.D, one of prominent personality in plastic surgery in Romania.

In 1992, under the patronage of the international association “Medecines sans frontieres” – A.Z.G. Netherlands, Irina completes her professional training with a three months internship in Holland, under the direction of Prof. Dr. Ph. A. Nicolai at the Medical University of Groningen. Dutch experience enriches her knowledge in the field of hand surgery, focused on the flexor tendon repair.

In 1996, Irina Visa completes her Ph.D. under the direction of Prof. Dr. Aurel Kauffman, at the University of Medicine “Iulius Hatieganu” in Cluj Napoca, Romania, with the thesis “Clinical and technical criteria in the surgery of the flexor tendon of the hand”

In 1995, The Romanian Society for Surgery of the Hand - R.S.S.H. was founded in Brasov, during the National Congress of Plastic Surgeons. The forming of this Society was the result of an increasing interest of Romanian plastic surgeons for the hand surgery, which at that time represented about 50% of the daily medical (surgical) activity. Dr. Irina Visa has been one of the founding members and was elected the first President of this new born Society.

Irina Visa lead the organization for two terms as president of R.S.S.H. (1995-2000 and 2001-2005), during which the Society become affiliated with two major international forums: IFSSH - Vancouver in 1998 and FESSH - Barcelona in 2000.

To promote the development of the hand surgery in Romania, Irina Visa established a strong partnership and collaboration with the Romanian Society of Microsurgery, organizing jointly the National Congresses, participating as a lecturer in courses organized by Prof. dr. Alexandros Beris in Greece (1997,1999,2002), Prof.Dr. Alexander Georgescu in Cluj – Napoca (2007).

Between 1994- 2009 Irina was Head of Plastic Surgery Department of the Emergency County Hospital Brasov. Since 2012 she continued her medical activity in private Hospitals.

Paracelsus's quote "Skill in surgery is obtained with great painfulness" followed Irina's professional life.

## Andrew J. Weiland

American Society for Surgery of the Hand

## Andrew J. Weiland

A native New Yorker, Dr. Weiland received his undergraduate degree from Colby College and his medical degree from Wake Forest School of Medicine in 1968. He then took 2 years of general surgery training at the University of Michigan, Ann Arbor. He served the following 2 years in the U.S. Army at Fort Jackson, South Carolina as a trainee in orthopaedic surgery. He left the service in 1972 as a major in the medical corps to enter the orthopaedic residency program at the Johns Hopkins University School of Medicine. This was followed by a hand fellowship with Dr. Harold Kleinnert in Louisville, Kentucky, after which he returned to Johns Hopkins on the staff of the Department of Orthopaedic Surgery as chief of hand surgery.

At Johns Hopkins in Baltimore, he carried out fundamental research studies on vascularized bone graft, including epiphyseal plate transplantation and composite allograft tissue transplantation. This was done with NIH support for over 15 years. Numerous publications and peer reviewed journals resulted from these studies. In 1990 he returned to New York and joined the staff at the Hospital for Special Surgery as Surgeon in Chief for four years.

Dr. Weiland's exceptional ability to teach residents and fellows has been evidenced by him being selected as the recipient of the Nancy Bischoff Award for outstanding resident mentoring on 5 different occasions.

Most recent clinical research has focused on distal radial plate design to minimize tendon rupture, and experimental studies dealing with swivel lock repair of scapho-lunate ligament tears.

This clinical application was validated by cadaver study, which is being submitted for publication. He has also published over 250 articles in peer reviewed journals dealing with rheumatoid arthritis, Kienbock's Disease, clinical application of vascularized bone graft, composite free tissue transfer, basal joint arthritis, hand replantation, giant cell tumor of tendon sheaths and glomus tumors. He has also authored 4 books including a monograph on Kienbock's Disease and written 75 chapters in various text books relating to orthopaedic and hand surgery.

One of the most gratifying things he has done is participating in three Touching Hands Projects sponsored by the American Society for Surgery of the Hand two times in Honduras and once in Trinidad and Tobago. On these trips he performs surgery and teaches local physicians. He most recently attended the IFFSH meeting in India where several presentations were made. Dr. Weiland has also been visiting professor over 73 times with a significant portion of these were international in nature. He has also been active in the development of a distal radius plate fixation system which was designed to prevent any injury to the flexor pollicis longus tendon.

Dr. Weiland has been extremely active in various orthopaedic and hand societies. He has served as President of the American Society for Surgery of the Hand, the American Orthopaedic Association, the American Board of Orthopaedic Surgery, and the American Society of Reconstructive Microsurgery. In addition, he was Treasurer of the American Academy of Orthopaedic Surgeons. He was the past chairman of the American Foundation for Surgery of the Hand and recently was elected to the Board of Trustees of the Journal of Bone and Joint Surgery. He now serves as Chairman of that Board.

He has won the prestigious Kappa Delta Award from the American Academy of Orthopaedic Surgeons and Orthopedic Research Society twice which awards outstanding basic science research in the field. As mentioned previously he has been visiting professor in almost all 50 states. He is also an honorary member of the French Hand Society. In the Japanese Hand Society, he served as the keynote speaker for the Japanese Orthopaedic Hand Society and the Japanese Research Society. In May 2014 he was the keynote speaker of the Taiwan Society of Surgery of the Hand. He was also the recipient of the 2015 Tipton Award given for outstanding leadership in the field of orthopaedic surgery. He is considered an outstanding mentor and has taught hand and microvascular surgery to fellows and residents for almost four decades. When one considers his time in Baltimore and at the Hospital for Special Surgery it comprises over 120 hand fellows.

An annual research award has been established in his name at the American Society for Surgery of the Hand which honors academic hand surgeons and their contributions to hand and upper extremity research. Past fellows and residents have contributed to this award for which the recipient receives a twenty thousand dollar stipend. In addition he is also the recipient of the 2010 American Orthopaedic Association distinguished clinical educator award. Most recently, this past year the Hand and Upper Extremity Center at the Hospital for Special Surgery has been named the Andrew J. Weiland Hand and Upper Extremity Center in his honor.
